

TRANSFORMING HEALING TREATMENT

**\$50
Copay**

Our Functional Medicine approach is the healthcare of the future. This is the combination you have been looking for—we will educate and empower you to make lifestyle changes combined with a focus on the cause of the problem. We always treat patients rather than symptoms or the illness.

Regenerative medicine is a branch of tissue engineering and molecular biology which deals with the "process of replacing, engineering or regenerating human cells, tissues or organs to restore or establish normal function"

- CONDITIONS WE TREAT -

- Alzheimer's Disease
- Autoimmune Conditions
- Back Pain
- Bacterial Infections
- Bone Disorders
- Cancer & Its Prevention
- Fibromyalgia
- Gastrointestinal
- Heart Disease
- Wound Healing
- Joint Pain
- Knee & Hip Problems
- Kidney Problems
- Lung Disease
- Lyme Disease
- Multiple Sclerosis
- Musculoskeletal Disorders
- Nerve Damage
- Neurological Disorders
- Parkinson's Disease
- Peripheral Neuritis
- Psychiatric Disorders
- Respiratory Problems
- Rheumatoid Arthritis
- Thyroid Disorders
- Tinnitus

Whole Body Hydro-Hyperthermia

We are the only clinic in the USA that uses Hydro-Hyperthermia. It is one of the oldest forms of treatment, is a non-invasive, non-toxic treatment which induces a controlled feverish state in the body and it is a potent radio and chemosensitizer.

Stem Cells Transplant

We use umbilical cord blood cells, they are LIVE NUCLEATED CELLS that contain stem cells that will continue to produce anti-inflammatory and immunomodulatory components that optimize the local cellular environment. They produce growth factors, proteins, and cytokines that stimulate our own tissue to regenerate itself.

PEMF Bed

In 1979, the FDA approved the use of pulsating electromagnetic fields for the treatment of non-union and delayed union fractures. Today, it's approved for the treatment of many conditions including edema, pain and modulation of muscle tone.

DNA Nutrition Test

We use a scientific approach testing DNA using a saliva test kit exclusively for use with the Functional Genomic Analysis™ software program. Private, practical and personalized. Using scientific based research about genomics and nutritional ingredients has supported health and nutrition at the root cause based on unique individual differences and needs.

G-Force / Whole-Body Vibration

During G-Force whole body vibration (G-F/WBV) the body is gently lifted up and down along a vertical axis, exposing the body to an upward and downward force against gravity. When the body experiences these forces, it helps relieve pain by increasing circulation and can naturally help align the spine relieving back pain.

Catalyzing Nutrition

Whether patients are undergoing active therapy, recovering from Lyme, fibromyalgia, osteoporosis, autoimmune diseases, cancer therapy, or in remission and striving to avoid cancer recurrence. The benefit of optimal caloric and nutrient intake is well documented.

Hyperoxygenation

Hyperoxygenation and chronic (ongoing) diseases and conditions can affect the transfer of oxygen into the blood. Some of the advantages are stimulating the immune system to speed up healing, improving circulation by cleaning the arteries and veins, having anti-inflammatory properties, reducing pain, and improving brain function and memory.

Brain Feedback

Brain feedback is a technology that uses light and tone frequencies to re-balance brain wave activity and the right/left hemispheres, thus returning your access to the normality.

This is a great way to manage emotions, stress, and helps relieve migraines. If your brain is always busy coping with stress, there's not enough energy left for performance.
